

GREEN ECONOMY ACADEMY

Series

Climate Change, Migration and Health

*Embassy of Italy – Italian National Institute for Health, Migration and Poverty
University of Cairo – CGIAR*

The GREEN ECONOMY ACADEMY (GEA) is an annual event that addresses the issues of the Green Economy, from renewable energy to circular economy, water management, health and nutrition, climate change, and food security.

GEA 2025 will be dedicated to Climate Change, Migration and Health

Participants will have the opportunity to deepen their understanding and develop practical skills on aspects such as:

- Understanding the impacts of climate change on human health.
- Analyzing the specificities related to age and vulnerabilities, in particular migrants and minors, in the response to climate change.
- Exploring the connections between climate change and communicable and non-communicable diseases.
- Identifying mitigation and adaptation strategies to address the health impacts of climate change.

The 2025 Academy will be launched with a one-day International Conference at the Fairmont Nile City Hotel –Cairo on 17th December 2024.

The Conference will give the opportunity to co-create the teaching modules for the rest of the 2025 School's program, when training courses on the nexus between climate change and health will be provided to young professionals on a full-immersion working week.

17th December 2024 9am-4pm
